Website About Us Page: IPITeC is a modern intellectual property firm on the cutting edge of technology.

Intellectual property encompasses three distinct areas of law. It includes copyright, trademarks, and patents along with some variants. We can address all three areas of law, from registration (royalties, publishing, and licensing) to valuation, and from protection (policing, oppositions, encumbrances, etc.) to litigation.

Moreover, due to the increased complexity of technology and emerging markets, we can implement modern ways of addressing IP innovation including through the use of NFTs and the blockchain. We feel this service best represents the changing nature of the industry and therefore our unique quality as a consulting service.
