

Permanent Tooth Development

Primary Tooth Development

Old & New Toothbrushes

How to Floss

- Use about 18 inches of floss wound around one of your middle fingers, with the rest wound around the opposite middle finger.

- Hold the floss tightly between the thumbs and forefingers and gently insert it between the teeth.

- Curve the floss into a "C" shape against the side of the tooth.

- Rub the floss gently up and down, keeping it pressed against the tooth. Don't jerk or snap the floss.

- Floss all your teeth. Don't forget to floss behind your back teeth.

How to Brush

- Place the toothbrush at a 45-degree angle to the gums.

- Move the brush back and forth gently in short strokes.

- Brush the outer surfaces, the inside surfaces and the chewing surfaces of all teeth.
- To clean the inside surface of the front teeth, tilt the brush vertically and make several up-and-down strokes.

- Brush your tongue to remove bacteria and keep your breath fresh.
