PVC Patches

The PVC's rubbery texture provides a convincing backdrop for the clean, high-end, and brightly colored design that acts as the patch's focal point. If you want to make PVC patches for your company, you have reached the right place.

Sequin Patches

The sequin patches are shiny patches that never go out of fashion. It's easy to jazz up your merchandise with the help of these colorful, glittering, and three-dimensional patches. These custom sequin patches beautifully bring up vivid colors.

Applique Patches

One kind of high-end patch is an applique patch constructed from many fabric pieces. Each modern, elaborate patch has a different color palette, pattern, and fabric selection. You can buy applique patches online by sending us a message.

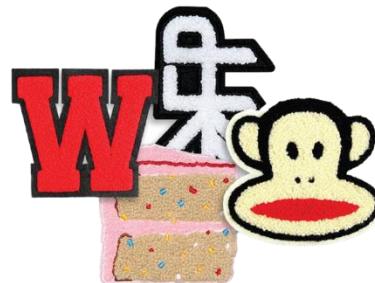

Leather Patches

You may choose authentic, high-quality, or faux leather that looks and feels very close to the real thing to get your custom leather patches designed. We offer split leather with an industrial look that can iron onto various materials. Just tell us your design and make your own leather patches.

Embroidered Patches

One of the most popular types of patches, custom-made embroidered patches are also among the most stylish and trendy patches. Get in touch now if you want high-quality, custom-design embroidered patches.

Chenille Patches

A chenille patch is a plush and stylish addition to any outfit. Famous for their fluffy feel and colorful look, chenille patches are a staple of every fashionista's wardrobe. Incorporating a 3D appearance and vibrant color choices, this patch is the epitome of style. You can design your own chenille patches by telling us what you exactly want.

Woven Patches

Expert handiwork is on full display in carefully woven patches. A thinner and finer thread is used on a fabric background to create these patches, giving them a more refined and expert appearance. They are ideal for making the appearance of high resolution and highlighting details.

Sublimated Patches

Patches that have been sublimated are known as photo-realized patches. Sublimation is the most trustworthy technique for precisely copying designs from parchment onto a patch. Any image sewn into one of these trendy patches will seem as good as new, thanks to the patch's glossy, immaculate, and highly diligent finish.

CAPS
