How would you paint success?: My vision of success is to have a seamless client to business relationship integration. I envision having our clients trust our services will remediate, secure and optimize their business activities in a effortless manner. Our goal is to build continuous profits with efficient marketing because of our reputable services. We desire to add more clients each month and learn from each of our experiences.
Who are your client or audience serving?: Small to medium businesses (doctor's/lawyer offices, stores, virtual organizations) that need effective computing and cloud-based operating environment. We will also aid firms that have antiquated computer infrastructure optimize their services by building a security posture.
What is their geography?: Our clients will end up being wide-ranging. We will service customers in our local cities of South and Central Florida. Primarily Pembroke Pines and Kissimmee. We also intend to market to virtual clients based in the United States and Caribbean.
What are their preferences?: Security that is effective and prompt without the inconvenience of drawn out steps.
What mode of delivery do they prefer?: An online portal or application. We will use the DUO software to administer our services.
How will you reach them?: We will reach them through various mediums such as social media and SEO marketing. We also want to create incentives through a referral program.
What are your unique abilities, services, products and remarkable offerings?: We have tailored security policies that specifically meets an organization's requirements. We will conduct a thorough assessment of their business environment. Two-factor authentication is proven to block 99% of account compromise attacks.
Who are your competitors?: McAfee, Broadcom, UDT, Lan InfoTech, Preemo, Tech Hero, Bayshore Interactive.
Website in your industry that you like?: www.mind-core.com
OPTIONAL: Another website in your industry that you like?: www.broadcom.com/
What do you like about these websites?: I love broadcom's simplistic but elegant structure that has easy to find services. Each service or offering has a link to a page that outlines the process in detail. Their landing page is straightforward.
